Web Developer

- **Education:** Computer Science, University of Oklahoma (2016 - 2019)
 - **Bootcamp:** Edex Web Development Bootcamp (Graduating May 2025)
-

Projects

[Clock In / Out](#)

A NextJs (React + Node) app I wrote a while back.

- Utilizes NextJs, a fullstack React framework
- Implemented database storage for punch-ins with MongoDB.
- Implemented login and user feature using Auth0

[PEAN Stack TODO App](#)

I created this app to show my ability to learn the basics of new tech stack fast. It took about 7 hours.

- Used a kanban Board to track progress
- Learned Angular for the first time
- First implementation of Postgres and Sequelize ORM outside of class
- Express JS + Sequelize Backend

[scones.ike.coffee](#)

A website created for my bike-delivery scone business in South Minneapolis:

- Successfully integrated Stripe API for payment processing.
- Designed an automated email alert system for order notifications.
- Handles real-world business operations, generating \$50–\$200 monthly.
- Future Goal: Expand into a full custom POS system for a coffee shop.

[sorcerersoup.com](#)

An ongoing passion project for a Computer-Assisted Role-Playing Game (CARPG):

- Created a templating language for generating custom spells.
- Designed an application wizard to assist users in creating characters.
- Continuously evolving with plans to add new features.

[Stateless Blog](#)

A small single page web app that stores its contents in the URL

- Created using entirely Vanilla JS and HTML/CSS
 - Fun concept for creating a blog with database-like capabilities without using a database
 - Utilizes LZ Compression.
 - Supports markdown
-

Skills

- **Version Control:** Git, GitHub, Gitflow
- **Programming Languages:** Typescript, JavaScript, HTML, CSS, Python, Java, C, C++
- **Frameworks & Libraries:** SvelteKit, Next.js, ExpressJS, React, Vite
- **Other Tools:** Stripe API, Nodemailer
